

Course Title	Pharmacology for Primary Health Care for Registered Nurses and Midwives
Course Description	The course is designed for registered nurses and midwives to gain knowledge and skills needed for permission to acquire, keep, prescribe and issue medicines in primary health clinic practice in South Africa. The main purposes are to ensure that nurses have knowledge and competency in pharmacology, so as to meet the legal requirements for prescribing and dispensing of medicines and to equip nurses to become safe practitioners in their prescribing roles.
Admission Requirements	Diploma in General Nursing and Midwifery
Delivery Methodology	Classroom; Lecturers from the Department of Basic Medical Sciences present this course.
Duration	80 contact hours
Price	Please contact the course coordinator
